SUMMARY

Software Engineer with 3+ years of experience building, testing, and deploying web applications with TypeScript, JavaScript, React, Angular, Node.js, and SQL. Experienced with CI/CD, Agile teams, and AI as a development tool, including Claude, Gemini, and GitHub Copilot.

SKILLS

Programming Languages: JavaScript, TypeScript, Java, Python, SQL

Frontend: React, React Native, Angular 18+, Vue, HTML5, CSS3

Backend: Node.js

Databases: PostgreSQL, Microsoft SQL Server (MSSQL), MySQL

DevOps and Cloud: CI/CD, Jenkins, GitLab CI/CD, Docker, Kubernetes, AWS, Microsoft Azure, Git

AI Tools: Claude, Gemini, GitHub Copilot

Methodologies: Agile, Scrum, Jira, Story Points, Sprint Planning, Software Development Life Cycle (SDLC)

Also Familiar With: Spring Boot, Django, Flask, Ember.js, C, C++

EXPERIENCE

Software Engineer | Capital One | February 2023 - Present

- Developed an internal Jira-style application for about 5,000 users across 8+ business units to cut costs.
- Develop applications using TypeScript with Angular, plus JavaScript, React, and Node.js.
- Led remediation of security vulnerabilities to meet security and risk requirements.
- Design, code, test, and deploy new features using CI/CD best practices.
- Identify and troubleshoot system and software issues and develop solutions.
- Use SQL to manage databases and maintain data integrity.
- Test and validate programs with QA to improve performance and meet quality standards.
- Work with an Agile Scrum team to plan and review sprints, using Jira and story point estimates.
- Apply AI as a tool for debugging, prototyping, and migrations, including Claude, Gemini, and GitHub Copilot.
